

AMERICAN UNIVERSITY OF SCIENCE & TECHNOLOGY
CSI 205 – COMPUTER PROGRAMMING I
PROJECT II – FALL 2020-2021
Due Monday, December 14, 2020

Write a C++ program to input 2 different numbers and an operator from the screen. Compute the result of the operation depending on the type of the operation. (Ex: addition, subtraction, division, multiplication, modulus.) Output the original numbers together with their result. The program will keep on asking the user to enter two numbers and their operator until the operator "?" is entered. **Use a switch structure to choose the type of the operation. Use a function for each option.**

Grading for this project will be based on the following:

Documentation	10%
Program structure	40%
Program Correctness	25%
Program Execution	25%
